

BURIED TREASURE

Summer 2014

Rannveig Wallis, Llwyn Ifan, Porthyrhyd, Carmarthen, UK. SA32 8BP

As you will have noticed, this list is later than usual. This is deliberate for two reasons: it has enabled me to inspect size of most bulbs to validate pricing and; to include seed. For this reason there will be no winter seed list. This means that seed is fresher and you can sow it earlier.

As usual some stock is only available in small numbers and is supplied on a first come, first served, basis.

Terms of Business: Please pay by "Not to Exceed" **cheque made out to "R Wallis"** or include a list of substitutes. Failing this I will credit your account for the following season for any out of stock items. Overseas customers can pay by Paypal, in which case please include your email with the order and I will send you an invoice when I dispatch your order; by Sterling International Money Order or: in cash (Sterling, Euro or US dollar are accepted, in this case I advise using registered mail). Please note that I can only accept orders placed before the end of August. Parcels will be dispatched in the last week in August or beginning of September. If you are going to be away please let me know so that I can coordinate dispatch. I will not cash your cheque until your order is dispatched.

Acis autumnale var pulchellus (formerly **Leucojum**) A Moroccan version of this excellent early autumn flowerer. It is quite distinct in the fact that the pedicel and bract are green rather than maroon as in the type variety. Good in a raised bed in full sun. 3 for £2.50

Acis ionica I have very few bulbs of this large, early autumn-flowering snowflake from Cephalonia in the Ionian islands. £3.00

Acis niceaense From the Alpes Maritime. White bells on 10cm stems are produced in May. £2.50

Albuca humilis 15cm spikes of marzipan-scented white flowers with a central green stripe in summer. £2.00

Albuca sp yellow This "appeared" in our collection – a nice surprise. Yellow & dusky-green flowers on 40cm stems £2.00

Allium acuminatum ex NNS00-12. Dog Mtn, Columbia Gorge. Umbels of 10–40 brilliant rose-violet flowers on 10 cm stems on this tiny west coast onion from a moist maritime climate. The tepals are distinctively sharply pointed and out-curved. 3 for £4.00

Allium bollandieri From the Siskiyou mountains. Striking heads of violet purple stars on 15 cm stems. £2.50

Allium elburzense One of the super little Iranian drumsticks (Acanthoprasum section) with heads of white, purple marked flowers which sit between the beautiful glaucous leaves. Very choice. These do not multiply vegetatively and raising them from seed is a long process. £5.00

Allium geyeri Heads of pale pink flowers. From damp meadows in the Cascades. Easy outside. 3 for £2.00

Allium karataviense Seed raised stock of which I have two forms, both of which are easy in the garden:

Form 1 – pale pink flowers with prominent rose red ovaries nestled between the superb glaucous, olive-green leaves. £2.00

Form 2 - white flowers and lime green ovaries. £3.00

Arisarum vulgare Green striped spathes produced in autumn. 3 for £3.50

Arum creticum 2006 seedlings from the yellow flowered FCC stock. £3.00

Bellevalia hackellii Portugal. A curious symphony of gold, brown and blue. Small bulbs so: 3 for £4.50

Bellevalia hermonis RRW9916 We have been advised that this is the name for this bulb with two toned spike of buff flowers going into purple at the top. From the Chouf mountains, southern Lebanon and no name as yet. Shown and admired in the South Wales show in 2004. Only small bulbs this year hence.... 3 for £4.00

Bellevalia pycnantha We raised these from JJA Seeds. It colours large areas moistened by snow melt in Turkey and Iran with its inky blue spikes. It is a widespread plant and should do well on the rock garden. £2.00

Biarum marmarisense Fantastic 10cm long creamy spathes are produced in autumn. £3.00

Biarum tenuifolium Brown spathes and spadix in June after the leaves are dormant. £2.00

Bongardia chrysogonum One of the tuberous *Berberidaceae*. I have a small number of large tubers available. £5.00

Brimeura amethystina var alba Easy and very beautiful in the garden and flowers in late May – June. 3 for £2.00

Brimeura fastigiata "white flowered form" A sweet little Corsican bulb for a pot and the late shows. Wide open flowers on short stems in June. £2.00

Brodiaea elegans Umbels of large dark blue-violet, funnel-shaped flowers on short stems. £2.00

Chionodoxa cretica Rarely offered snow melt plant with racemes of pale blue flowers which open flat in mid March. £2.50

Chionodoxa forbesii The true plant which grows near Fethiye in SW Turkey. White centred dark blue flowers. £2.00

Chionodoxa luciliae The nomenclature of the Turkish species is a bit of a minefield but this is the one with huge deep blue, white throated flowers. We believe this to be the true plant which came from Liz Strangman and it agrees with what we found on Boz Dag, the type locality, earlier this year. £2.00

Chionodoxa luciliae var alba The wonderful white form of the above which grows so well in Jenny Archibald's garden. £2.00

Chionodoxa nana A small Cretan species believed to be a high altitude form of *C cretica* with lots of pale blue flowers. £2.50

Colchicum baytopiorum from S Turkey. A neat dwarf Colchicum, large, open pink non-tessellated, flowers appear with the neat bright-green leaves in the autumn. A great one for the autumn shows. This had done very well this year so... Special offer 3 for £7.00

Colchicum boissieri Twiglet-like corms produce very neat, sherry glass-sized, pink flowers. Great for autumn shows. £2.50

Colchicum davisii N of Haruniye. Very distinct Turkish species recently described in the New Plantsman. The pink tessellated flowers appear in early autumn from the sausage-shaped horizontal corms. Perfectly hardy outside but flowers best in the bulb frame. £3.00

Special Offer 3 for: £2.50

Corydalis section Corydalis

This section includes all the *Corydalis solida* types with small tubers which multiply vegetatively. Most grow best in cool woodland conditions with a not-too-dry summer.

Corydalis angustifolia Mostly white, occasionally pale pink flowers over neat narrow foliage. A plant of the moist Caucasus and Elburz which should do well outside. £3.00

Corydalis angustifolia 'Gemini' We collect some seed from a twin-spurred form of this and it breeds true with little *Dicentra*-shaped flowers in a sort of off-white. Unique! £5.00

Corydalis caucasica subsp caucasica The joy of the Caucasus with its rose purple flowers. It grows in shade, flowering as the snow melts. £3.00

Corydalis glaucescens Seedlings of plants we obtained many years ago as *C kashgarica*. Soft pink flowers. £3.00

Corydalis henrikii Very long mauve flowers on erect spikes from a very restricted area of Turkey near Gaziantep. £4.00

Corydalis maculata This is a Korean species with fine purple flowers over deep green foliage which is easy to grow in a pot with the Middle Eastern species in this group. £6.00

Corydalis malkensis One of the best outdoor species which seeds around freely yet it is only above the ground briefly, showing off its large-lipped creamy white flowers, so it is never a nuisance. £2.50

Corydalis tauricola Elegant sprays of long pink flowers on 15 cm stems. £3.00

Corydalis triternata This differs from *C tauricola* in its nectaries which being hidden inside the flower make the difference rather immaterial. Nevertheless this Syrian species also has the elegant spray of pale pink flowers. £3.00

Corydalis section Leontocoides

The glory of the snow melt and excellent plants for a pot in the alpine house. It is not easy to obtain stock of this group since the tubers rarely divide and are self sterile so you need at least two clones to get seed. I offer 3 -4 year old seedlings which are not huge but neither is the price.

Corydalis chionophylla A very rarely offered inhabitant of the Kopet Dag in NE Iran with large pink and white spurred flowers. £6.00

Corydalis macrocentra A striking plant with deep yellow flowers over a long period which contrast with the very neat deeply cut grey foliage. £6.00

Corydalis nariniana Beautiful dwarf species from SE Turkey with large purple and white flowers. £6.00

Corydalis verticillaris One of the gems of a very beautiful section with spikes of anything from creamy white to pale pink, long spurred flowers which in some can reflex in a loop right over the back of the flower like a posing ballerina. £8.00

Crocus goulimyi These have grown extremely well this year and should produce their lovely long tubed mauve chalices for the autumn shows. £2.00

Crocus kotschyianus var leucopharynx Lacks the yellow spots of the type so has an attractive white throat. An easier *C karduchorum* look alike. £2.00

Crocus niveus Large pure white flowers with a long tube and a yellow throat are produced in late autumn. £2.50

Cyclamen repandum/rhodium Mixed seedlings. These originated from those known as *C rhodium* subsp *peloponnesiacum* and most have some silver spots on the leaves and pale flowers with a darker nose. They do well under the hedges (and under the greenhouse staging) in our garden here in west Wales. 3 for £5.00

Dicentra cucullaria A stunning 15cm tall north American woodlander with deeply cut grey foliage and spikes of creamy-coloured Dutchman's breeches-shaped flowers in April. £2.50

Dipcadi serotinus A Spanish plant with bluebell-like spikes of green and tan flowers in early summer. £2.00

Eythronium dens-canis 'Harlequin' A really good, rapidly increasing, garden plant in Jenny Archibald's west Wales garden with deep pink flowers. £4.00

Erythronium 'Pagoda' Pale lemon flowers held above the foliage. Another good one for the garden. £4.00

Eucomis autumnale subsp amaryllidifolia In our opinion, one of Jim Archibald's best introductions from S Africa. Dwarf "pineapple top" over neat foliage. Green flowers on a dense stem in mid-summer. Dry in winter, water in summer. £3.00

Freesia occidentalis White flowers in early spring. Cold greenhouse hardy! 3 for £2.50

Fritillaria crassifolia ssp crassifolia In the wild, a committed scree dweller but easy in cultivation. This year I can supply seedlings of our own collections (RRW93025) from near Kahramanmaraş in S Turkey. In the wild these plants are only 6 cm tall with flowers which sit on the stones. £4.00

Fritillaria crassifolia ssp kurdica Flowers may be purple, green, yellow or more commonly some combination of these. This stock raised from seed of plants found from near Tabriz, Iran at 1750m, tends to have yellow tipped flowers. £4.00

Fritillaria elwesii Tall and stately with narrow black and green striped bells. This year I have stock of the original Peter Davis collection, PD265065 which is dwarfer than many other introductions. 10+ spawn bulbs for: £3.50

Fritillaria olivieri A robust species in the *crassifolia* group from moist fields in the Zagros mountains of Iran. We can offer 2 forms:

a = PF2057 10+ spawn bulbs: £3.00

b = no data but close to flowering size: £4.00

Fritillaria reuteri A rarely offered plant of the Baktiari country in the Zagros where huge colonies of it can be found in running snow melt water. Superb mahogany bells with yellow tips. £5.00

Fritillaria thunbergii Creamy-white flowers with green veins. This is stock we had some years ago from a Chinese nursery and it has flowered much more readily than our old clone. £3.00

Galanthus species ex Georgia. We grew all these from wild seed which originated in Georgia and have used the names that the Georgians, who fall into the "splitters" camp, use:

G alpinus near Dagnali, N of Tblisi, 1000m £5.00

G caucasicus Borjomi - Bakuriani, Georgia, 900 m £5.00

G lagodechianus near Gremi monastery, 450 - 500 m £5.00

G schaoricus Nakeratos Pass near Lake Shaori, NE of Tqubuli, Georgia, 1000 m. £5.00

Galanthus gracilis Distinctive narrow twisted grey green leaves characterise this Snowdrop. The inner tepals have a green mark on both the base and the tip. 3 for £6.50

Galanthus peshmenii The Turkish autumn flowering snowdrop. Easy in a pot or planted in a sunny spot in the garden. £6.00

Galanthus peshmenii "Kastellorizo Form" Rix4010 Vegetatively propagated bulbs of the original introduction of the form from the island of the same name by Martyn Rix. In this, the AM clone, the leaves appear with the flowers. £10.00

Snowdrop Cultivars

'Diggory' - a *G plicatus* type with flowers the texture of seersucker. The outer segments incurve at the apex to resemble a whisky still. £25.00

'Ione Hecker' One of the 'Mighty Atom' group and I think one of the best. Originally from Michael Upward. £15.00

'Lady Elphinstone' The well known yellow-tipped double. 3 for £8.00

wariae An imposing green-tipped *G nivalis* with large flowers. Not unlike a large *G nivalis* 'Sharlockii' with an enormous, unsplit spathe. £5.00

'Wasp' A *G nivalis* with unusually long tepals. £10.00

Gynandrisis sisyrinchium RRW95.28 A Syrian selection of this irid which clothes the hillsides in blue every spring afternoon. £2.00

HYACINTHELLA is a delightful, underrated, genus which contains some real gems for the early shows where they are becoming increasingly popular (and winning!) exhibits.

Hyacinthella glabrescens This one is named after its grey-green leaves but the striking racemes of lovely blue bells are why we grow and show it. £2.50

Hyacinthella heldreichii ex RRW92103 from the central Cilician Taurus. A beautiful dark blue-flowered form. £2.00

Hyacinthella JCA18611 Turkey, Antalya, nr. Gündümuş seems to be intermediate between *H glabrescens* and *H heldreichii*. £2.00

Hyacinthella lazulina Little mid blue flowers, with no visible pedicel, pose up the stem. £2.00

Hyacinthella millengrenii A low altitude species endemic to the limestones of Cyprus. Spike-like racemes of about 10, sessile, pale-blue bells above 2 glaucous leaves. It increases rapidly. 3 for £2.50

Hyacinthoides lingulata (formerly **Scilla**) An easy-going reliable little bluebell which is excellent for the autumn shows. Sweetly scented, upward-facing, blue flowers on 10cm stems. I can offer three different forms which vary in both flowering time and shade of the blue. To ensure that one at least is in flower for the show: 3 of each form for £10.00

Hyacinthoides reverchonii Another superb dwarf bluebell which is endemic to Sierra Cazorla. 15cm tall. Easy in a pot and will grow outside. £2.50

Ipheion dialystemon Bright yellow flowers with brown stripes on the outside. Flowers over a long period in early spring. Dried bulbs may remain dormant for the first season. I will supply bulbs which have been kept slightly moist so hopefully these will not. 3 for £3.50

Ipheion ostenii A rarity from Uruguay. Heads of butter yellow flowers in late spring. Picture in AGS Bulletin 61:p 289. £3.00

Ipheion 'Jessie' A beautiful seedling of 'Rolf Fiedler' with even darker flowers. £2.00

Iris histrioides 'Major' A super dwarf bulb which is now difficult to obtain but it has kept going in our gardens for more than 30 years. Dark blue. £3.00

Iris suaveolens 'Yellow Form' Now referred to as 'Helvolus Group, AM' (cf Alpine Gardener 2012 Plant Awards Supplement p17). A diminutive bearded iris and a real treasure for either rock garden or pot. This very floriferous form has won at least three Farrer medals, including at Midland Show in 2013 and several Certificates of Merit. £3.00

Iris reichenbachii mixed colours. Seed raised from our show plants. Large bearded Irises on 15 cm stems. The colours can vary from yellow to deep mauve and since they have flowered, we can provide either yellow or mauve if you prefer. All are beautiful. £3.00

Iris reticulata 'Blue Ice' A fabulous selection made by John Fielding. White flowers and blue falls. Very few. £2.50

Ixia paniculata Branched racemes of stunning peachy blooms with a long tube in early summer. Easy and hardy under unheated glass and, as I write, the most spectacular plant in our bulb house. Special Offer: 3 for £4.00

Leucojum – please see **Acis**

Massonia echinata A tuft of white flowers beautifully nestled between two large ovate leaves. £1.50

Merendera montana Large pale pink flowers. Increases well. £3.00

Muscari armeniacum 'Gül' So much admired when I put it on my stall in Kent Show 2004, that it got taken to Joint Rock and awarded a PC as long as we named it! 'Gül' is Turkish for 'rose' which describes the flush on the otherwise white flowers. We have selected seedlings over several generations from our original introduction from the Taurus mountains and they now come consistently true. £3.00

Muscari azureum Beautiful and choice. Pale blue flowers on this snow melt bulb from Ala Dag, S Turkey. 3 for £2.50

Muscari coeleste ex BATMAN 299 Pale blue flared flowers in typical *Muscari*-like spikes with neat glaucous foliage. £2.00

Muscari aff discolor JJA 689. Turkey, Sivas, Ziyaret. 2100m. Exposed, limestone-gravel ridges. Similar to, but not the same as, typical *M. discolor* from the N edge of the Syrian Desert. Tiny with white-mouthed, dark-blue bells. Our view is that this is closer to *M anatolicum* but either way it is a smashing little plant. £2.50

Muscari inconstictum Eye catching electric blue and black flowers. A choice and striking plant from the Levant. £2.50

Muscari kerkis seed raised from Gothenburg AS54744. Small dark, white rimmed, fertile flowers overtopped with blue sterile ones. £2.50

Muscari leucostomum Ex a J. Ruksans coll. An eastern species, allied to *M. neglectum*, barely known in cultivation. Distinct blue-black flowers with distinct white lobes. £2.50

Muscari parviflorum It is not easy to persuade this autumn flowering species to bloom freely but we managed it for Horsham Show in 2006 and got a Certificate of Merit. The "hot, no repot" regime seems to work. For 5 bulbs - £2.00

Muscari sivrihisardaghlariensis Very popular when seed was offered because of its name. If you have a big enough label they are: £2.00

Muscari sp nova This little chap came to us from seed collected on the south side of Lake Van in Eastern Anatolia. It can have either pale blue or white flowers and is easy to grow. If it is not new then we cannot identify it in the up to date Flora of Turkey. £2.00

Muscari tenuifolius Cream flowers with prominent black teeth under a violet topknot of sterile flowers. 3 for £4

Narcissus bulbocodium ssp praecox var paucinervis RRW84.18 This is what the plant keys to according to Maire who made extensive studies of Moroccan Narcissi. I must confess that it would probably be better as a form of *N romieuxii* but it is quite distinct in that the trumpet is long enough to accommodate all the anthers and stigma. One of the earliest bulbocodiums to flower, often in January. The flowers open just above ground level and the stems gradually increase to 10-15cm. From near Ifrane growing at 1500m. £2.00

Narcissus calcicola Clusters of small dark yellow flowers on 20cm stems. 3 for £3.50

Narcissus cantabricus Sparkling white Spanish hoop petticoat. £3.00

Narcissus confusus Dwarf deep yellow trumpet section species from the Salamancas area. 3 for £4.00

Narcissus cordubensis A jonquil type from the area around Grazelema in S. Spain. Easily recognised by its frilly 6-lobed bright yellow corona. Wonderfully scented. A good garden plant. £2.00

Narcissus cyclamineus Needs no description. These were rescued from Jenny Archibald's garden where they do very well. £3.00

Narcissus fernandesii Seed raised from correctly identified wild stock. Lots of sweetly scented flowers with an undivided cup. £2.50

Narcissus jonquilla The sweetly scented jonquil which is rarely offered as the straight species. £2.00

Narcissus jonquilla var almadensis A rather nice dwarfer plant than the type. £3.00

Narcissus jonquilla var henriquesii A sub species with a longer straighter corona. 2-3 flowers on each 25cm tall stem. 3 for £3.50

Narcissus jonquilla var minor Amazingly floriferous sweetly scented jonquil with short stems. A must for every collection. £3.00

Narcissus romieuxii a pale lemon form. £1.50

Narcissus romieuxii var zaianicus We feel that these sit rather better under *N romieuxii* than *N albidus* (where they were listed previously). A very variable taxon from yellow through to almost white. £2.00

Narcissus 'Solveig's Song' A hybrid of my making between *N. bulbocodium tenuifolius* and *N. triandrus albus*. 1-2 flowers on a 12 cm stem. A 4cm long by 2cm wide corona is surrounded by twisted spreading tepals. Named (on Kath Drydens insistence) after my sister. Admired wherever she goes - the Narcissus that is. £2.50

Narcissus 'Tenuior' An old hybrid of *N. jonquilla x poeticus* described by Curtis in 1797. 20cm stems carry 4 cm pale yellow scented flowers. It is late flowering and so extends the daffodil season. Rarely offered. Special Offer 3 for: £4.00

Orchids – Please see separate section.

Ornithogalum nanum RRW00031 A particularly dwarf form of this alpine turf plant. Excellent for a pan. £2.00

Ornithogalum narbonense Seed collected in 2004 near Mugla, S Turkey. 25cm spikes of white flowers and a good garden plant. 3 for £2.50

Ornithogalum sibthorpiana Very similar to *O nanum* but has grooved flower stalks. A flat topped umbel of white flowers. £2.00

Oxalis speciosa We are often asked how we flower this plant. We just treat it like most of our bulbs. It is repotted each August and only a small number of the largest bulbs are grown on. In our experience it definitely does not need to be pot bound. 3 for £3.50

Romulea bulbocodium Tizi N'Tichka' Tizi 'N Tichka, High Atlas. Very distinct, yellow green outside with a purple inside both striped darker. The yellow throat bordered by white gives this the appearance of *Crocus sieberi* var *tricolor*. £2.00

Scilla cilicica RRW96.28. Shaded cliff base on Jebel Nusairia, Syria. We have now been persuaded that this is the correct name for this beauty since it fits with plants of that name in Israel. Racemes of pretty, reflexed flowers like small blue shooting stars. £2.50

Scilla greilhuberi From the moist Elburz mountains and grows well outside in a cool position. Much admired as a pot plant in Caerleon Show in 2004 where it gained a Certificate of Merit for Jim Archibald. Flowers like small blue Erythroniums in a loose raceme. 3 for £4.00

Scilla libanotica Seedlings from Lebanese stock. Large pale blue outward-facing flowers with conspicuous dark blue anthers. £2.50

Scilla melaina A fine garden plant with Prussian blue flowers. £2.00

Scilla messanaica Spikes of pale blue starry on 15cm stems from shady rocks in Greece. £2.50

Scilla rambourii Similar to the above but more numerous narrower leaves. S Spain & Portugal. £2.50

Sternbergia greuteriana To me, many of the plants available with this name look like *S. sicula*. This is the true almost sessile plant from

Karpathos. Small obtuse-tipped bright yellow tepals on a carpet of tiny green leaves. Can make a stunning potful.	£5.00
Sternbergia graeca Ex Connie Greenfield. An invalid name for a reliable, free flowering, dwarf form of <i>S. sicula</i> .	3 for £4.00
Tecophilea cyanocrocus The legendary Chilean blue crocus.	£5.00
Tecophilea cyanocrocus var leichtlinii Paler blue flowers with a white centre. Equally beautiful.	£5.00
Tecophilea cyanocrocus var violacea The fabulous intense violet form which flowers so well for us.	£5.00
Tritelia ixioides var ixioides Heads of dark yellow stars. Good summer flowering garden bulb for a warm spot. Special Offer: 3 for £2.50	
Triteleia laxa 'Dexter' Grown from seed as <i>T 'congesta'</i> previously and gained a PC in Edinburgh in 2001 (AGS Bull Dec 01). A fabulous and easy, compact form of the species with deep blue flowers in mid summer. A real show-stopper.	£2.50
Triteleia laxa A purple flowered form of this excellent garden plant.	3 for £2.50
Tulipa armena RRW05124 Turkey, Ağrı Province, Tahir Dag. The Eastern race of this stunning dwarf deep red tulip. Turkey, Ağrı Province, Tahir Dag.	Flowering sized bulbs £3.00
Tulipa cretica Small Cretan tulip. The 6cm white flowers with a yellow throat and a pink flush on the outside are carried on 15cm stems. This form increases readily by stolons. A wonderful pan plant.	£3.00
Tulipa aff humilis A small flowered Lebanese tulip with grey leaves and pink flowers. We think it is closest to <i>T humilis</i> .	£2.00
Zephyranthes drummondii A beautiful combination of grey leaves and pure white flowers in late summer. Fully hardy in an unheated greenhouse even though it emanates from SE USA.	3 for £4.00

HARDY ORCHIDS

Dactylorhiza foliosa Jenny Archibald has a few of these sumptuous marsh orchids to spare. They make an amazing display in her garden of great clumps of 15 cm long cerise-flowered spikes with a huge wide lip.	£15.00
Dactylorhiza maculata Again some stock of Jenny's huge clone of the Heath-Spotted Orchid which does so well in her garden on acid shale. Spikes of pale pink flowers on delightfully spotted leaves. Possibly a polyploid form.	£15.00

Orchid Alchemy has been set up by my son-in-law, Andrew, who trained in Wisley, Kew and at the Eric Young Orchid Foundation. These plants were raised from seed in flasks and have been weaned for at least two seasons in compost so they are well established tubers. Andrew has these Antipodean species available this year.

Diuris behrii The Golden Cowslip orchid has flower spikes to 50cm with up to four, 2.5cm yellow flowers which have rounded petals, a darker yellow lip and two long tails.	Near flowering size £16.00
Diuris corymbosa The Common Donkey orchid is a widespread species of southern Australia growing in open woodland. They have up to 5, 2.5cm yellow flowers with reddish purple markings.	Near flowering size £12.00
Diuris longifolia The Purple Pansy orchid has 40cm tall spikes with up to eight, 3cm purple and gold flowers which have upright rounded petals and two long downward pointing sepals.	Flowering size £18.00
Pterostylis pedunculata The spring flowering Maroonhood from southern Australia. Rounded 2cm flowers have a reddish brown face and white/green striped rear.	Near flowering size £8.00
Satyrium coriifolium Outstanding South African species with vivid orange flowers on stems up to 50cm tall. The top half of the flower forms a hood over the out swept petals.	2 years to flowering £12.00
Thelymitra luteocilium The Yellow Fringed Sun orchid is a pink flowered Sun orchid with its column surrounded by a yellow fringe. It has up to 6, 2cm flowers and the spike can reach 30 cm.	Flowering size £16.00
Thelymitra macrophylla A vivid blue, sweetly scented Sun orchid with a dozen or more 6cm wide flowers and a broad leaf up to 50 cm.	Flowering size £22.00

Orchid Alchemy also has a range of unusual tropical orchids and if you are interested in these please let me know and I will pass on your details or you can check out his website where there will be other hardy orchids on offer: www.orchidalchemy.com.

SEED

Freshly gathered seed this year from some of our choicest bulbs. We do not keep seed from year to year so I will be as generous as I can with the number of seeds per packet so that you can grow a good potful. All are £4.00 per packet.

Allium acuminatum ex NNS0012	
Allium crispum Heads of nicely shaped pinky-purple flowers on 15cm stems.	
Allium tolmei subsp tolmei NNS 0319 Heads of pink flowers on less than 10cm stems	
Bellevalia densiflora RRW9913 Lebanon near Zahle.	
Bellevalia koeiei (5 seeds only) Zagros mountains 2500m.	
Chionodoxa cretica	
Colchicum baytopiorum	
Colchicum brachyphyllum RRW9928. Large pink chalice in between a pair of glossy-green leaves.	
Colchicum cupanii subsp cupanii ex Crete. White – pale pink flowers	
Colchicum cupanii subsp glossophyllum ex mainland Greece	
Colchicum macrophyllum ex Martyn Denney 607, Simi. Huge tessellated stars in early autumn.	
Colchicum speciosum NE Turkey	
Colchicum umbrosum A delightful little plant from the moist woodland in NE Turkey.	
Colchicum variegatum Pale pink tessellated stars. Needs a pot in a hot place in the greenhouse.	
Colchicum woronowii Similar to <i>C speciosum</i> with flowers in the autumn. It needs to be kept moist.	
Crocus robertianus A beautiful pale mauve one for the autumn but not easy.	
Dipcadi serotinus Newly collected seed from near Asni in the High Atlas Mountains. These are orange-brown flowered.	
Dipcadi serotinus from our long cultivated stock with green flowers.	
Erythronium californicum	
Erythronium multiscapideum (cliftonii). The best stock of this beautiful fawn lily from the Feather River valley.	
Erythronium oregonum subsp leucandrum	
Fritillaria acmopetala subsp wendelboi RRW13222. The broad leaves and square bells make this a distinct, high altitude, subspecies.	
Fritillaria amana From various sources in the Amanus and Anti-Taurus mountains.	
Fritillaria carica JCA14538. From a particularly nice form of this diminutive little yellow-flowered Frit with brown shading on the outside.	
Fritillaria crassifolia subsp crassifolia ex Tahir Pass	
Fritillaria crassifolia subsp crassifolia ex Kahramanmaraş	
Fritillaria crassifolia subsp crassifolia ex Palendöken Mountains, 3500m	
Fritillaria crassifolia subsp hakkariensis A rare chance to obtain this SE Turkish endemic.	
Fritillaria crassifolia subsp kurdica ex Iran, S of Marand 1900m	

Fritillaria euboica I am really pleased that we can offer this superb yellow species which is endemic to Mt Dirfis on Evvia.

Fritillaria fleischeriana From a very steppic region of western Turkey.

Fritillaria orientalis Rock ledges on shady cliffs in the northern Caucasus. Huge hanging brown bells

Fritillaria raddeana NE Iran. This has grown exceptionally well planted out in a polytunnel but it will grow outside in most of UK.

Fritillaria serpenticola from a Salda Lake colony of this serpentine grower with a distinct rusty colour on the bright yellow flowers.

Fritillaria sewerzowii Brown or green flowers and easy to raise from seed. It is doing well planted out in our polytunnel.

Fritillaria sororum ex RRW9204 which is from Turkey, Içel, near Gulnar.

Gagea fibrosa ex Jebel Nusairia, Syria

Galanthus peshmenii

Hyacinthoides reverchonii

Hyacinthus litwinovii A rarely offered blue-grey hyacinth from NE Iran.

Hyacinthus orientalis subsp chionophylla Broad prostrate leaves and short spikes of gloriously scented flowers. Central Turkey.

Ipheion ostentii

Iris magnifica Easy outside even in our wet climate.

Iris nusairiensis This has produced some lovely offspring from past sowings (e.g. see Alpine Gardener 82(2) 228)

Leucocoryne coquimbensis ex F&W7088. Umbels of showy flowers in violet-blue and white, 30cm.

Moraea for the garden: All these yellow flowered species make splendid perennial plantings in our herbaceous borders. I have put the height at which they flower so that you can plan where to plant them. All flower in June here.

Moraea alticola 100cm

Moraea huttonii 80cm

Moraea moggii 50cm

Moraea spathulata 60cm

Moraea polyanthus but this one is for a pot. Blue flowered.

Muscari adillii ex LST097

Muscari kerkis ex AS54744

Muscari coeleste ex RRW12005. Turkey Bolkar Dag. The lovely pale blue flowers are flared rather than grape-hyacinth-like.

Muscari leucostomum Koet Dag, Turkmenistan. A large white stomum at the tip.

Muscari macrocarpum

Muscari mirum ex RRW11075 SW Turkey on serpentine

Muscari verticillaris Iran ex SLIZE 031

Narcissus alpestris

Narcissus calcicola

Narcissus obesus

Narcissus cyclamineus

Narcissus jeanmonodii New wild collected seed from damp patches in Morocco near Oukaimeden, High Atlas

Narcissus jonquilla var minor ex Spain, Andujar

Narcissus jonquilla Sierra de Cabra

Narcissus jonquilla var almadensis

Narcissus miniatus

Polyxenia longituba

Romulea hirta (yellow)

Romulea linaresii subsp graeca

Scilla cilicica RRW9628

Scilla khorrasanica An extremely local cliff dweller from the Kopet Dag near the Iran-Turkmenistan border. Beautiful!

Scilla libanotica RRW9904. From our best form of this large flowered species. Always admired in the South Wales Show in February.

Scilla rosenii Superb reflexed tepals but needs a cold winter (in the 'frig').

Scilla RRW076a This is a strange Scilla which is probably undescribed. Pale blue. NE Iran, Olang Pass in the eastern Elburz mountains

Scilla ramburei We have quite fallen in love with its dense little conical heads of blue flowers on short stems.

Tecophilium cyanocrocus These three could produce quite a colour range.

Tecophilium cyanocrocus var leichtlinii

Tecophilium cyanocrocus var violacea

Trillium rivale

Rannveig Wallis, Llwyn Ifan, Porthyrhyd, Carmarthen. UK SA32 8BP
